

Scouts and Scouters:

The following compass points were taken using a Garmin GPS. All bearings are true north, so you will need to subtract four (4) degrees from all readings taken with a compass.

You should keep in mind that some of the routes, if followed with no deviation to the course, will take you off of Camp Buffalo property. They may also take you directly through shooting ranges. With this in mind, please remind anybody running a route not to cross over fences or cut across farm fields.
